

## Night Flight Safety

Night flight has some significant advantages including smoother air, less busy controllers, and a better chance of spotting traffic. It also has some increased risk, particularly the lack of suitable forced landing sites in case of engine power loss. This seminar will help you prepare for night flight. We will also discuss the regulation concerning night flight including minimum equipment requirements and managing risk when flying at night.

**Directions:** On Hwy 680, exit onto Capital Expressway. Travel Southeast on Capital. At Cunningham Ave. turn Right. Ried-Hillview Terminal building is straight ahead on the left.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
